Touch HMI Solutions

The Best Choice for Building/Factory/Machine/Home Automation

• Introduction

ICP DAS provides two types of touch HMI devices, the TPD series and the VPD series. The TPD series is designed for home/building automation applications and the VPD series is designed for factory/machine automation applications. Both have many common features, such as a high-color high-resolution touch screen, RTC, RS-232/RS-485 and Ethernet. For the TPD series, users can use an external wall box to help smoothly blend the TPD series device into decoration. For the VPD series, the rubber keypad, IP-65 waterproof front panel and DIN-Rail/panel mounting are designed for harsh environment, and are especially suitable for factories.

HMIWorks is a free development tool that can be used to design ladder diagrams for softPLC logic for TouchPAD. A single TouchPAD becomes a touch HMI device which runs ladder logics.

• Features

- High-color high-resolution touch screen
- Power over Ethernet (PoE)
- RS-485 (including SelfTuner)/RS-232 (3 pins)
- RTC (Real Time Clock)
- Buzzer
- Rubber Keypad (Option for VPD Series)
- Free development tool: HMIWorks
- Support the C language and Ladder Designer
- Support user-defined third party protocol (C language)
- Modbus protocol enables remote control of I/O modules and integration with SCADA software
- Waterproofed Front Panel (VPD: IP65, TPD: IP40)
- Operating temperature: -20 ~ +50 °C
(2.8 inch Series: -20 ~ +70 °C; 7 inch Series: -10 ~ +60 °C)

• HMIWorks - Free Development Software

HMIWorks *The development software for the TouchPAD series*

HMIWorks is a free development software for TouchPAD series products of ICP DAS. It features of many widgets, built-in extensible graphics library, intuitive design, C programming, Ladder Diagram support, fully I/O integration... etc. HMIWorks helps users to short the development time and design the sophisticated, cost effective solutions for the complex systems.

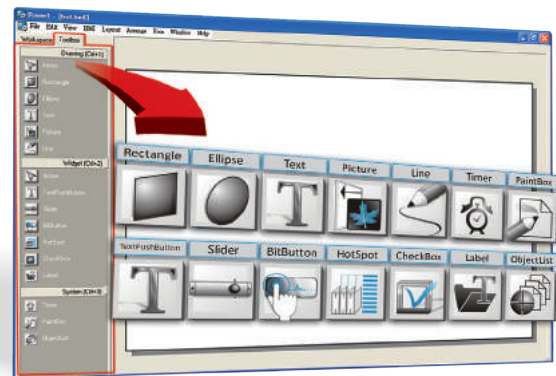

Intuitive Design

HMIWorks provides an intuitive graphical design interface that allows users to focus on what they want to do. By getting rid of the programming details and being more intuitive, everyone can easily finish their projects.

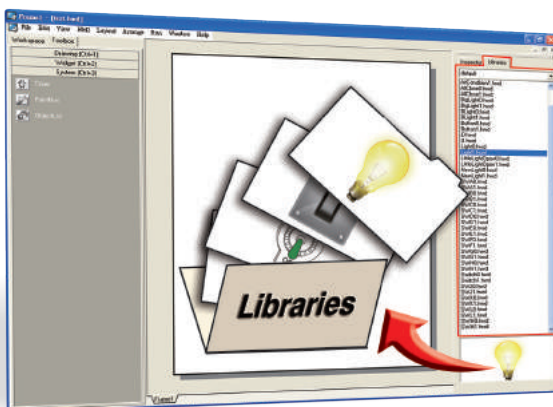

Support Many Widgets - Shorten Development Time

Many widgets are included in the HMIWorks development tool, including Rectangle, Ellipse, Text, Picture, Line, TextPushButton, Slider, BitButton, HotSpot, CheckBox, Label, Timer, PaintBox, ObjectList, providing the most commonly-used functions, such as drawings, event handlers, and timing control, which effectively shortens development time.

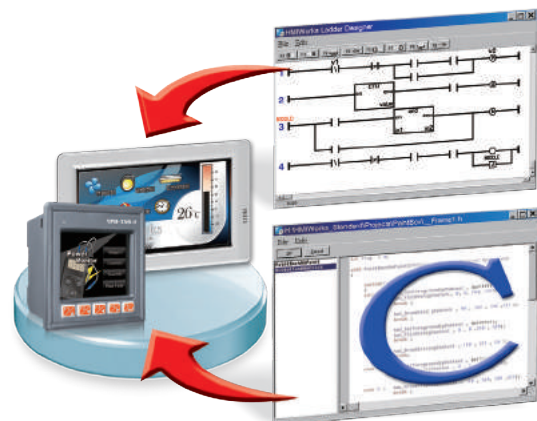

Built-in the Extensible Graphics Library

HMIWorks provides a variety of graphics for common situations. Users can also add their own graphics (supports JPG, BMP, WMF and EMF) to the library by the common painting or photo editing software.

C and Ladder Diagram Programming

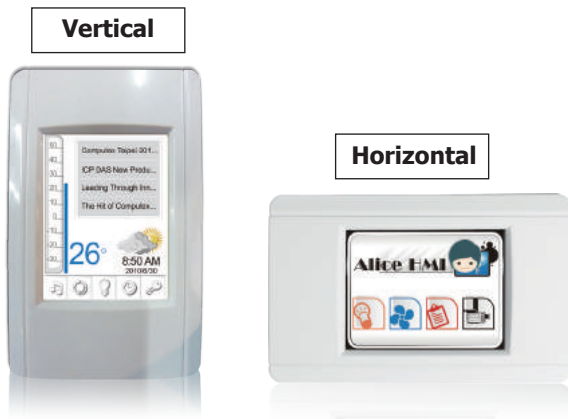

HMIWorks supports "Standard C" for users of programmer and "Ladder Designer" for user of PLC. These two program can be used alone or in combination. "Standard C" also provides a rich TCP/IP and Uart API, allowing users to develop private communication protocols for devices that are not using standard Modbus protocols.

Vertical or Horizontal Display

TouchPAD can be installed as "vertical" or "horizontal" depends on your need.

Fast-start the Main Program

The main program is fast started and ready to work within few seconds after powered on.

Multilingual Functions

TouchPAD can display multilingual text including English, Russian, French, German/Italian/Spanish, CJK (Chinese/Japanese/Korean) and others. This feature helps users designing user-friendly interfaces.

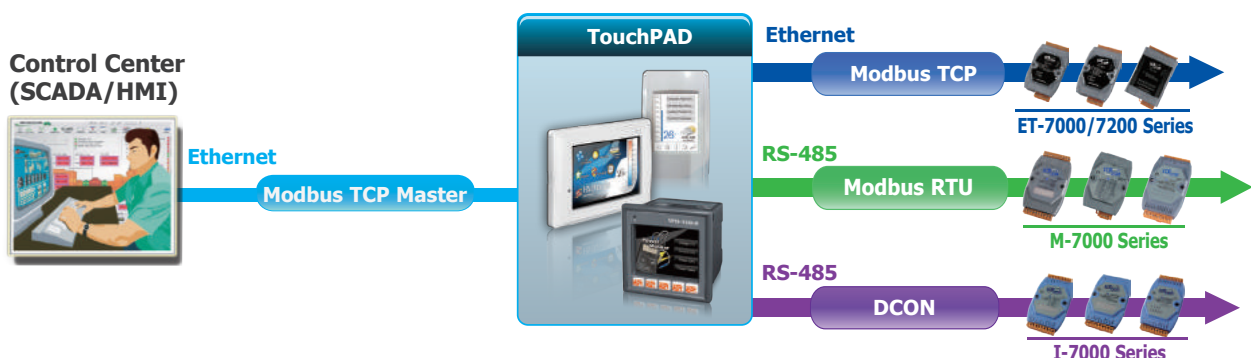

65536 Colors - Bright and Clear

Presently, LCD touch screens are available at 2.8", 3.5", 4.3" and the TouchPAD series includes different resolutions from 240 x 320 x 16 to 480 x 272 x 16. ICP DAS will expand this range in the future.

Flexible Communication Interfaces and I/O Expansion Capability

TouchPAD is equipped with RS-232/422/485 or Ethernet communication interfaces. It is easy to control various remote IO modules with standard Modbus TCP/RTU or DCON protocols, and some models support XV-board for local I/O expansion. TouchPAD can also work as Modbus TCP/RTU slave device for easy integration with SCADA software.

TPD-280-H

TPD-280U-H

TPD-283-H

TPD-283U-H

Features

- High-color high-resolution touch screen
- PoE (Power over Ethernet)
- RS-485 (including Self-Tuner)
- RTC (Real Time Clock)
- Free HMIWorks development tool
- Support C language and Ladder Designer
- Support user-defined third party protocol (C language)
- Modbus TCP/RTU protocol
- Operating Temperature: -20 ~ 70 °C

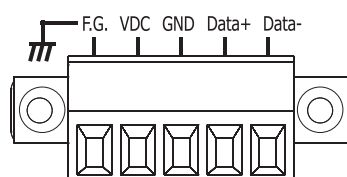

Introduction

The **TouchPAD TPD 2.8" Series**, TPD-280-H/TPD-280U-H/TPD-283-H/TPD-283U-H, is a series of touch HMI and designed for building and home automation. The TPD 2.8" Series is equipped with high-color high-resolution TFT touch screen and fits in with regular electrical wall-mount outlet. Besides, it is seamlessly integrated with rich I/O modules and presents beautiful, flexible and user-defined picture frame. In short, it is the best choice to upgrade the mechanical switch to intelligent control pads.

For PLC users, HMIWorks provides Ladder Designer, and for IT users, C language environment is provided. Especially, it only takes no more than 30 minutes to learn how to create an application program of TouchPAD series devices when using Ladder Designer. Moreover, by utilizing the Ethernet functionality of the TouchPAD, users can easily implement a redundant control solutions. With all the features provided, TouchPAD series touch HMI Devices must be the most cost effective HMI Device ever been in the market.

TPD 4.3" Series

TPD-433-M2

TPD-432F-H

TPD-433F-H

Features

- High-color high-resolution touch screen
- PoE (Power over Ethernet) for TPD-433 Series
- RS-485 (including Self-Tuner)
- RTC (Real Time Clock)
- Buzzer
- Free HMIWorks development tool
- Support C language and Ladder Designer
- Modbus TCP/RTU & DCON protocols
- Support user-defined third party protocol (C language)
- Operating Temperature: -20 ~ 50 °C

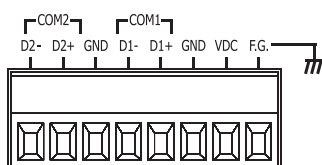

Introduction

The **TouchPAD TPD 4.3" Series**, TPD-432F-H/TPD-433F-H/TPD-433-M2, is a series of touch HMI and designed for building and home automation. The TPD 4.3" Series is equipped with high-color high-resolution TFT touch screen and fits in with regular electrical wall-mount outlet. Besides, it is seamlessly integrated with rich I/O modules and presents beautiful, flexible and user-defined picture frame. In short, it is the best choice to upgrade the mechanical switch to intelligent control pads.

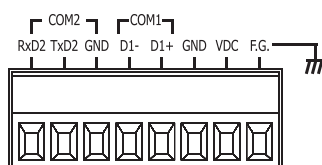

For PLC users, HMIWorks provides Ladder Designer, and for IT users, C language environment is provided. Especially, it only takes no more than 30 minutes to learn how to create an application program of TouchPAD series devices when using Ladder Designer. Moreover, by utilizing the Ethernet functionality of the TouchPAD, users can easily implement a redundant control solutions. With all the features provided, TouchPAD series touch HMI Devices must be the most cost effective HMI Device ever been in the market.

- I/O Expansion Board: XV-board
- Front Panel: IP65 Waterproof
- Operating Temperature: -20 ~ 50 °C

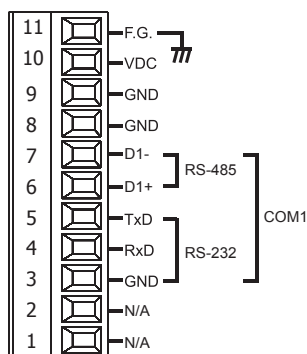

Introduction

The **TouchPAD VPD 3.5" Series** is a series of industrial touch HMI devices that features 3.5" high-color high-resolution touch screen LCD. With touch screen capability, it is easy to deploy into all kinds of automation systems, and make them more intuitive and efficient. Either setup new system installations or complete system retrofits, VPD series stands out for its wide variety of communication methods. Its built-in communication ports include RS-232/RS-485 and Ethernet(for VPD-133 series) interface, enable integration into the system allowing users to control, monitor I/O at the remote sides. Besides, front-panel IP65 waterproof as well as the rubber keypad make VPD series more reliable for rugged environments.

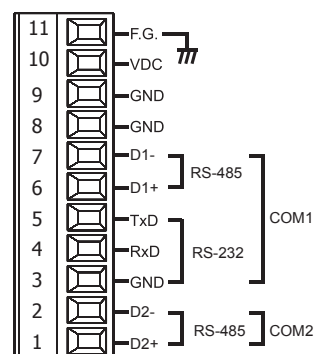

HMIWorks, the free development software for VPD series, provides an easy-to-use environment, and powerful and intuitive programming with graphic capabilities to let users create appealing graphical interface screens in minutes. For PLC users, HMIWorks provides Ladder Designer and C language environment for IT users. Especially, it only takes no more than 30 minutes to learn how to create an application program when using Ladder Designer. With all the features provided, VPD series touch HMI Devices must be the most cost effective HMI Device ever been in the market.

Remote I/O Modules

• M-7000 Series

The M-7000 remote I/O modules support DCON protocol and Modbus RTU protocol. According to the different applications, we have developed various I/O modules includes digital I/O, analog I/O, timer/ counter, RS-232 to RS-485 converter, USB to RS-485 converter and RS-232/422/485 to Fiber Optics, etc.

TPD Series Applications

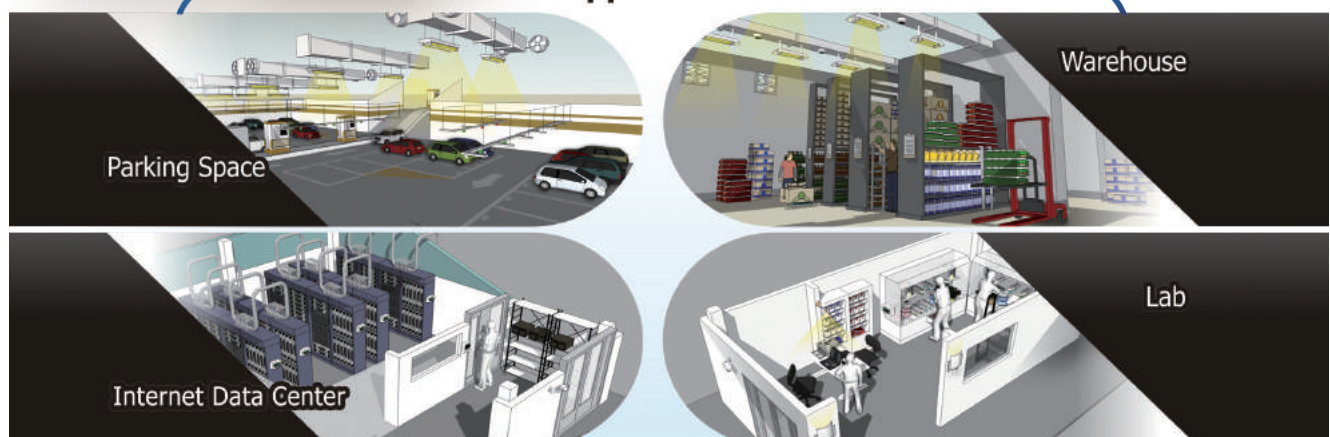

Intelligent Lighting Control System

The smart lighting control system is an intelligent network based lighting control solution that provides the right amount of light where and when it is needed. The LC series is lighting control; the PIR series provides human motion detection and temperature measurement. They are widely used lighting control and dimmer control on both indoor and outdoor of commercial, industrial, and residential spaces. The WISE controller is used in remote logic control and monitoring. Therefore, the TPD series and InduSoft Software through WISE controller provides users interface for easy set-up of the lighting control.

Remote Control Loop Control Scheduling Scenario Control

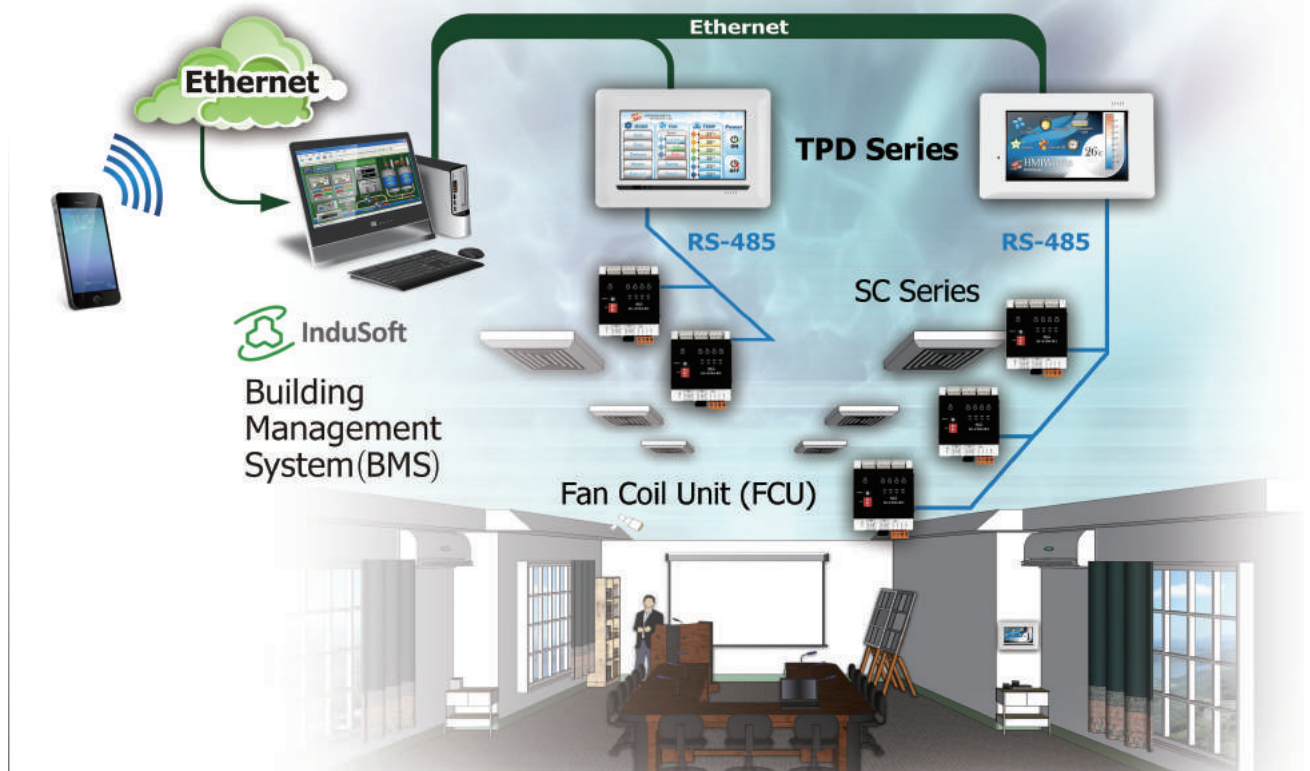

Application

FCU (Fan Coil Unit) Control System

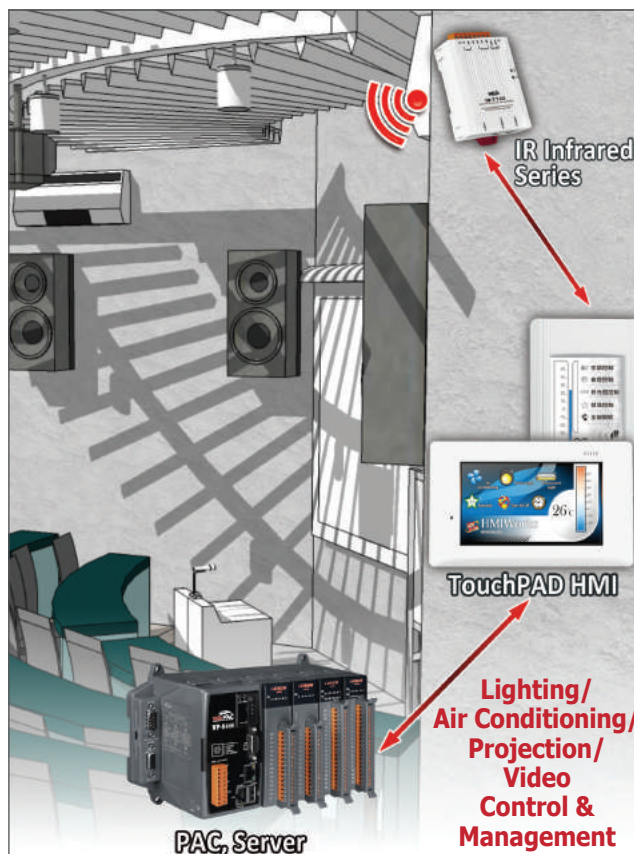

FCU system widely use in commercial building, with SC series relay board and TPD series thermostat, it allows you set up the indoor temperature. The SC series focus on controlling air flow of FCU, and the flow rate of the 2-way valve or 3-way valve for the chilled-water and hot-water in FCU. Moreover, the TPD series provides users interface for easy set-up of the temperature and air flow.
